WET MOPPING GUIDE

Use the guide below to help choose the right products for your floor care needs.

General Mopping

Choose mops with high absorbency, release and durability. If laundering facilities are available, it is beneficial to take advantage of launderable mops to save money. For performance and durability choose a synthetic blend or rayon mop with looped end and woven tailbands.

Finish Mopping

For finish mopping applications look for a rayon or synthetic mop. These mops offer high absorbency and release. To make sure you are achieving maximum floor coverage with minimal streaking choose a tailband and looped end yarn.

Yarn

- It is important to choose the right mop in order to get maximum efficiency
- Some yarns naturally perform specific cleaning tasks better than others

Yarn Ply

- Yarn ply is the number of strands twisted together to make a single yarn strand
- Although more plies give added strength, it does not always mean higher quality yarn
- More strands can add durability, but they decrease absorbency
- It is better & more cost effective to choose a higher quality yarn than a high ply, low quality yarn

Twist

- The “twist” of a yarn is a result of how tightly the fiber strands are wound together
- A tightly twisted yarn might have more strength & last longer, but it can have less absorbency
- The best choice is determined by the type & quality of the yarn, as well as the mop’s construction
- Mops with looped-end construction allow the yarn to have a loose twist without the fraying

	Advantages	Disadvantages	Use
Cotton	Good absorption & retention with limited shrinkage & a low initial cost.	Break-in period required. Slow drying yarn leads to mildew & deterioration. Lints.	Designed for general use. Scrubbing & cleaning up liquids.
Synthetic	Long stable fiber offers excellent tensile strength without linting.	Higher cost. Poor absorption.	Rough surfaces.
Cotton Synthetic Blend	Excellent choice for performance, price & durability. Synthetic fiber offers durability & color options.	Possible shrinkage.	Requested by professionals who require a better, longer lasting mop.
Rayon	Absorbs quickly with easy release. Dries fast & is mildew resistant. Cleaner yarn with less linting.	Shrinks when laundered and has less liquid retention.	Use for applying liquids such as disinfectant or floor finishes.

ENVIRONMENTALLY FRIENDLY

The majority of our mops are made with recycled material.

Textured polyester tape. 1.25" Width

Handle — Quick Change/Release

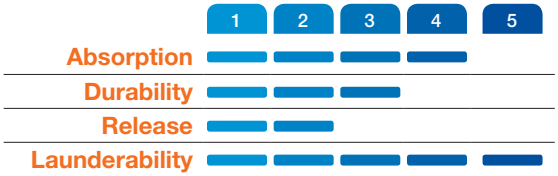
We do not accept returns on any Dinex® equipment or Dinex® custom products.
Please contact your local Dinex® representative to ensure order accuracy prior to ordering.

Cut-End Or Looped-End

Cut-End
- Cut-end mops are the most popular
- Low purchase price compared to looped end
- Cannot be laundered
- Cover less area per pass when mopping

Looped-End
- Superior performance & lasts longer than cut-end mops
- Launderable
- Tailband style gives better mopping coverage
- Looped-ends prevent fraying & unraveling so you can achieve reduced labor costs & replace mops less often
- Although the initial investment is more than a cut-end style, the life expectancy makes looped-end mops a more economical choice

How We Rate Our Mops



Absorbency
The absorbency of a mop refers to the ability to pick up and retain liquid. Higher levels allow faster floor drying times, leading to greater productivity and safety. Rayon and cotton yarns have the highest absorbency.

Durability
Mop durability is a measure of how long it will last or perform before needing replacement. Synthetic and blended mops are the most durable.

Release/Retention
Release is the ability of a mop to disperse liquid onto the floor or during wringing. Higher levels allow faster and more complete wringing, as well as more efficient application of cleaning solutions on the floor.

Launderability
The launderability is based on the number of washing cycles it can withstand before the construction of the mop is degraded. Synthetic and blended fiver mops have the highest levels of launderability.

Sizes Are Indicated By Tailband Color

Small

Medium

Large

X-Large

Brick Packs
Mops that are available in brick packs reduce cube up to 62%

(Item #s ending with a "B" are sold in brick packs)

Items in this section are purchased through Carlisle FoodService Products and will ship separately from Dinex orders. Please contact your local sales representative for more information.

LOOPED END MOPS

Synthetic/Cotton Blend Looped-End

- Maximum Durability
- 50-75 uses per mop
- S, M and L are available in brick packs
